

Overzicht van afgekeurde elektriciteitsmeters

De netbeheerders controleren in gebruik genomen elektriciteitsmeters periodiek en steekproefsgewijs. Ieder jaar rapporteren zij welke meters niet meer aan de gestelde eisen voldoen. De Rijksinspectie Digitale Infrastructuur (RDI) publiceert een overzicht van de afgekeurde meters. Het overzicht bevat alleen meters die nog zijn geïnstalleerd. Het overzicht vernieuwen we een keer per jaar.

Een afgekeurde meter herkent u met behulp van een aantal kenmerken van de meter.

1. Metercode*

De metercode is een code die bestaat uit 4 of 5 karakters. De code is meestal op de opschriftenplaat vermeld. Staat deze er niet op dan bepaalt de netbeheerder die op basis van de metereigenschappen.

2. Bouw- of revisiejaar*

Het bouwjaar staat op de opschriftenplaat. Dit is het jaar waarin de meter is geproduceerd. Bij oude mechanische meters vindt u in de meeste gevallen hetzelfde jaar terug op een verzegeling die op het meetinstrument is aangebracht. Bij een oude meter komt het voor dat deze is gerepareerd, herkeurd en opnieuw in gebruik is genomen. Op de meter is dan vaak het woord 'Revisie' geplaatst. De originele verzegelingen van een gereviseerde meter zijn vervangen. Er zijn verzegelingen geplaatst met het jaartal waarin de revisie heeft plaats gevonden. Treft u dus een verzegeling aan met een ander jaartal dan het bouwjaar dat op de opschriftenplaat staat, dan betreft het een gereviseerde meter.

3. Fabrikant

De naam of het logo van de fabrikant vindt u op het meetinstrument.

4. Type

De type aanduiding staat op het meetinstrument.

* De metercode en het bouw- of revisiejaar zijn minimaal nodig om de meter te kunnen herkennen. Deze gegevens horen bij elkaar en kunt u niet los gebruiken. De gegevens staan bij uw netbeheerder in de administratie.

LET OP:

De afkeur hoort bij de regionale netbeheerder. Controleer daarom altijd of de netbeheerder in de eerste kolom overeenkomt met de netbeheerder in uw regio. Staat de bij u geplaatste elektriciteitsmeter in de tabel, dan moet de netbeheerder deze vervangen.

Als de bij u geplaatste meter is afgekeurd, dan neemt uw netbeheerder altijd zelf contact met u op. Zij maken met u een afspraak voor een meterwissel. U hoeft zelf geen actie te ondernemen. De netbeheerder of een aannemer vervangt de meter.

Heeft u vragen over een aangekondigde meterwisseling, wilt u een afspraak verzetten of de slimme meter weigeren? Neem dan contact op met uw netbeheerder.

Heeft u vragen over deze lijst? Neem dan contact op met de RDI.
